

Envysion Insight

Service Description

Managed Video as a Service (MVaaS)

In addition to the benefits of Envysion Video, Envysion Insight goes beyond traditional security and loss prevention applications by integrating video with business tools such as Point of Sale (POS), Electronic Article Surveillance (EAS), and Access Control systems. Operators benefit from easy-to-use remote viewing of live and recorded video from an unlimited number of locations, providing insight into operations, loss prevention, marketing effectiveness, merchandising and customer behavior. Envysion drives demonstrable results for users, enabling them to improve profitability and the customer experience in every location, every day, without straining the IT organization or network.

Powerful Search Capabilities
 The ability to search for video by date/time, by POS transaction data or by specific motion saves time and eliminates tedious manual searching.

Customized Reporting
 Custom store-level and above-store reports enable you to monitor the metrics that are most important to you. Just click on a line of data in the report to see video of that transaction.

Automatic User-Defined Email Alerts
 Receive an email when one of your reports indicates that a business rule that you defined has been violated (such as number of voids per day or average time for order fulfillment) – then take action to remedy the situation.
