

# Envysion Video

## Service Description

## Managed Video as a Service (MVaaS)

Envysion is an award-winning innovator in web-based video management that is redefining video surveillance and providing demonstrable results for its customers. Unlike other video surveillance services, Envysion leverages the Managed Video as a Service (MVaaS) platform, which means it is easy to use, highly scalable, centrally managed, and it does not strain customers' IT staff or network. Envysion Video enables organizations to leverage remote video and provides operators insight to improve performance in every location, every day.

### Easy-to-Use Web Interface

An intuitive web browser interface lets you and other users across your organization get up to speed quickly and maximize your use of the system.

### Powerful Search Capabilities

The ability to search for video by date/time or by motion after it is recorded saves time and eliminates tedious manual searching.

### Secure Video Clip Sharing

Burning video to CDs is a thing of the past. Create user groups and share video securely over Envysion's MVaaS platform.

### Scalable Centralized Administration

Centrally manage and monitor who can access video and what they can access from a single login with just a few simple key strokes.

### Automatic Upgrades

MVaaS eliminates the burden of costly and time-consuming software upgrades while simultaneously giving the customer access to the highest quality, feature enhanced applications.
